

Case Study - Darwin Recruitment

As IT Recruitment specialists, Darwin recruitment has experienced great success and growth. Expansion into an adjacent floor allowed for this growth, Talis Projects were chosen to undertake the interior works.

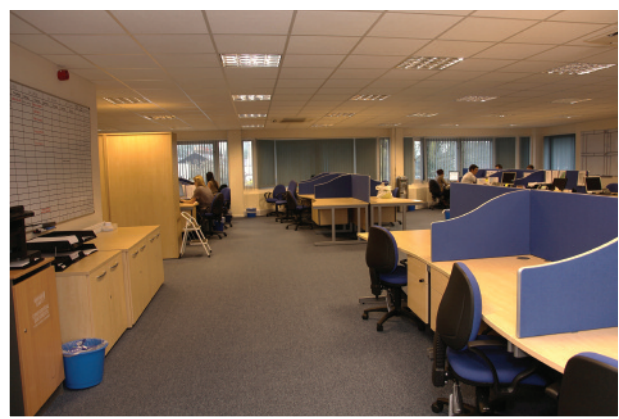

This involved space planning, structural revisions, new meeting areas and a reception, ceilings, partitions, lighting, furniture, electrical and data installations amongst many other disciplines. We also managed the building control applications and health & safety administration.

The project was completed on time, to budget with no disruption to their business which was not affected by the adjacent works through careful scheduling and management of the works.

"We have experienced consistent and sustained growth as a company, resulting in dramatic increases in staff numbers and the size of our office environment. Talis Projects have supplied us with all aspects of our office environment, from furniture, through to partitioning, electrical and data works to decoration and floor-coverings, and consistently meet our deadlines and budgets.

We have worked closely with Talis Projects from the start and have always found them to be reliable, competitive and professional.

Out of Hours works are always completed on time with the area left clean and ready for work in the morning.

We would have no hesitation in recommending them whatsoever."
